Aim of the project

The main aim of the project is to raise awareness in the topics of environmental problems and sustainability.

As the decision makers of the future, the participation of the youth in addressing environmental problems is of the utmost importance, which requires them to know the actual cause and effect of the issue.

The objective is to enhance the awareness of the youth in this issue and provide them with necessary tools to take action.

Objectives of the project

To improve key competences of young people engaged in environmental issues and promote active citizenship:

- by providing high-level sessions and training specifically prepared for the training course by experienced professionals and promoting active participation of youth
- by providing necessary skillsets, different tools and follow-up action list for participants to organize various events in local communities that address and promote green thinking

To strengthen cooperation between international organizations and scale of youth activities

- by creating a chance for partnership building among people of participating organizations in international level
- by providing necessary tools for participants to develop international project idea with their chosen partner organizations

To encourage youth work with the highest quality

- by sharing best experiences in the environment and fight against climate change
- by providing useful resources to youth workers in the mentioned topic
- by learning from the experience of other participating organizations working in environment and climate change topics

Profile of the participants

- Young people with fewer opportunities
- Youth who are interested in increasing their knowledge about climate change and being active citizens.
- Youth workers actively working at local level
- Environmental activists working at the local level
- Students studying ecology, environmental engineering, climate studies, environmental science and sustainability, and similar majors
- People working in/with governmental organizations within the scope of this topic
- Local decision-makers, policymakers
- Teachers working with pupils teaching environmental science

Impact of the project

The impacts of the project can be divided into short-term and long-term:

Short-term:

- To increase awareness in environmental problems and its core reasons;
- To support the improvement of society to become more informed and problem-solver in environmental issues;
- To provide with required knowledge and skills to understand environmental problems and handling methods

Long-term:

- To build a network and partnership among youth for further projects in environmental issues;
- To establish a good foundation for trainers of future
